RS. 8,000 ~~RS. 8,999~~

DESCRIPTION

ULTRA-Z Water washing machine water softener protects your washing machine from the hard water. It secures your washing machine and clothes from lime scales caused by hard water and other impurities using a water softening filter.

If you also felt that your clothes look dull and the fabric has lost its shininess after washing them in your washing machine.

Then use Ultra-z Water Washing Machine Water Softener. It reduces the effect of lime scales on your dresses. Thus retaining its color and softness.

As water quality worsens day by day, repairing the washing machine may cost you more than installing a water softener, and sooner it is going to be necessary for everyone to install a water softener in your home.

Our water softener can fit with both semi-automatic and fully automatic washing machines.

WHY THIS PRODUCT

- **Increase the Life of your Washing Machine**
- The minerals of magnesium and calcium in hard water create scaling in your pipes and washing machine. With Ultra-z Washing Machine Water Softener, now you can reduce the effect of hard water minerals and can increase the life of your washing machine.
- **Increase Washing Efficiency - Reduces Water and Detergent Consumption**
- With the help of Ultra-z Washing Machine Softener, you can get soft water for your clothes at any time, which helps you to enhance the life of your clothes while maintaining their color. Further, it also reduces the consumption of detergent and water for washing your clothes.
- **Compact Design:-**
- The compact and smooth design of the Washing Machine Water Softener makes it easy to install with the washing machine even in tight spaces without any difficulty.
- **Easy to install:-**
- This Water Softener is extremely easy to be installed & operate. Equipped with a unique filter, it does not require regeneration.
